

Cancer is Not Our Destiny

The People's Cancer Incidence Screening Tool (PCIST)

A Citizens' Project in Support of Dignity-Based Epidemiology in Pennsylvania

Community Cancer Incidence Report for Deemston Borough, Washington County, PA

Prepared 5-August-2025; last updated 22-August-2025. Available at: www.pcist.net

People's Cancer Incidence Screening Tool (PCIST)

1

We calculate the average annual crude incidence of 23 different types of cancer over a 20-year (2002-2021) period in a PA town, borough or municipality

2

We compare the local cancer incidence numbers to the national, state and county numbers to identify significant "cancer signals" with elevated rates

3

We take the median age of onset of each type of cancer and compare it with the median age of the town, county, PA and US populations to assess the effect of differences in population age on the cancer rates

4

We investigate and address probable causes of elevated "cancer signals", including heavily polluting industries; infections associated with cancer development; and predatory marketing of addictive toxins to communities

Cancer	U.S. Median Age of Onset
Brain and Nervous	61
Breast (F only)	62
Cervical	50
Colon and rectal	66
Esophageal	68
Hodgkin's Lymphoma	39 (bimodal, 20 and 55+)
Kidney and renal	65
Laryngeal	66
Leukemia	65-74, varies by type
Liver and bile	62 (liver) and 70 (bile)
Lung and bronchial	71
Melanoma (skin)	(skin, 66)
Myeloma	60
Non-Hodgkin's lymphoma	67
Oral and pharyngeal	64
Ovarian	63
Pancreatic	70
Prostate	66
Stomach	68
Testicular	33
Thyroid	51
Uterine	60
Urinary and bladder	73

Cancer Rates Vary By Age

The U.S. national, PA state, PA county, and municipal/township/borough cancer incidence rates used in PCIST are crude rates. We derive these by taking the total number of invasive cancer cases that occurred in a specific population (<20 yrs, <30 yrs, adults 20+, and All ages — total, females & males) in relation to the total number of people in that specific segment of the population. This produces a value that represents the amount of cancer in a community relative to its relevant population size. These values are then compared to generate incidence ratios. In our community reports, we flag municipal “cancer signals” with a percentage rate equal to or more than 10% higher than the US, PA and County numbers.

It is important to note that most cancer rates increase with age. To help interpret the effect of a population's age distribution on its crude incidence rates, the following is provided:

- 1) A reference table (at left) with the median age of onset of each type of cancer in the U.S. as per the American Cancer Society
- 2) The relevant median population age for each municipality/ township/borough, the county, PA state, and the US nation in the PCIST report
- 3) A chart that shows the precise population age distribution in 5-year increments, derived from the 2010 US Census figures that are used in PCIST's 20-year calculations

When analyzing cancer signals, it is important to note that (with the exception of Hodgkin's lymphoma and testicular cancer) a younger population's crude cancer incidence rates will be under-represented when compared with an older population.

PCIST uses publicly available data sources from the American Cancer Society; the PA Cancer Registry via the PA Department of Health; the CDC SEER and WONDER databases; and the U.S. Census' American Community Survey. None of these providing institutions are responsible for PCIST calculations, interpretations and reports.

Please visit www.pcist.net or contact PCIST@pm.me for a detailed explanation of the PCIST project and more information about the People's Cancer Incidence Screening Tool.

MORE Air & Water Pollution: OUR CONTEXT for RISING CANCER

In the community of Deemston, residents have faced **elevated cancer rates for 20 years**.

WHY? CUMULATIVE IMPACTS

Deemston is located in the most heavily fracked county in Pennsylvania, which is itself part of a large and growing **environmental justice zone** above the Marcellus Shale. Since 2004, thousands of oil and gas wells have been **hydraulically fractured**. Many residents now live within a few miles of dozens of active wells and multiple compressor stations. Energy companies often abandon unplugged oil and gas wells and contaminate drinking water sources with **fracking wastewater** – a toxic slurry of “industry secret” chemicals, radioactive particulate matter such as radium, and PFAS “forever chemicals”.

Residents also face significant legacy and contemporary pollution due to the long history of bituminous **coal mining** in southwestern Pennsylvania. Intensive agriculture with **chemical pesticides and herbicides** widely contaminates residents’ soil and water supplies. A network of state and inter-state highways, including the I-70 and I-79, brings a steady flow of trucks and **diesel emissions** into Washington County. The heavy pollution from all of these activities compounds and travels, producing **significant cumulative impacts** on residents’ health.

Additionally, Deemston residents require adequate medical screenings and treatments for **infections that can contribute to cancer**, such as HPV (cervical cancer), EBV (Hodgkin’s lymphoma), Hepatitis B and C (liver cancer), H. pylori (stomach cancer), and HIV (many cancers). In pursuit of profit, companies also sell already vulnerable residents **addictive products** that contain carcinogenic substances, such as tobacco and alcohol.

TOTAL CANCER IN DEEMSTON

During **2002-2021 (20 years)**, the average annual crude cancer incidence rate among residents of all ages in **Deemston** is greater than the corresponding rate for the **US; PA; & Washington Co** by:

All Age Cancer in Deemston	> US	> PA	> Wash
Laryngeal	296%	230%	174%
Hodgkin’s lymphoma	278%	220%	179%
Oral and pharyngeal	260%	230%	157%
Stomach	257%	218%	180%
Leukemia	209%	167%	142%
Kidney and renal	160%	131%	102%
Melanoma (skin)	153%	135%	180%
Liver and bile	138%	118%	107%
Colon and rectal	138%	95%	63%
Lung and bronchial	129%	89%	57%
Non-Hodgkin’s lymphoma	98%	64%	48%
Esophageal	96%	53%	33%
Urinary and bladder	62%	19%	1%
Brain and nervous	49%	29%	21%

2010 Median All Population Age: The total Deemston population (43) is **comparable to** the US (36.9), PA (39.8) & Washington County (43)

◆Please visit www.pcist.net or contact PCIST@pm.me for more information about the People’s Cancer Incidence Screening Tool

FEMALE CANCER IN DEEMSTON

During **2002-2021 (20 years)**, the average annual crude cancer incidence rate among females of all ages in **Deemston** is greater than the corresponding rate for the **US; PA; & Washington Co** by:

All Age Female Cancer in Deemston	> US	> PA	> Wash
Leukemia	445%	371%	321%
Oral and pharyngeal	424%	363%	240%
Hodgkin's lymphoma	315%	244%	191%
Melanoma (skin)	269%	239%	301%
Ovarian	195%	149%	121%
Uterine	164%	93%	74%
Colon and rectal	125%	81%	55%
Lung and bronchial	101%	66%	39%
Liver and bile	95%	88%	55%
Breast	91%	70%	56%
Non-Hodgkin's lymphoma	56%	27%	12%
Pancreatic	44%	17%	16%
Cervical	23%	25%	11%

2010 Median Female Age: The total female Deemston population (42.9) is **comparable to** the US (38.1), PA (41.2) & Washington County (44.4)

2010 Median Male Age: The total male Deemston population (44) is **older than** the US (35.6); PA (38.3) & Washington County (41.7)

◆ Please visit www.pcist.net or contact PCIST@pm.me for more information about the People's Cancer Incidence Screening Tool

MALE CANCER IN DEEMSTON

During **2002-2021 (20 years)**, the average annual crude cancer incidence rate among males of all ages in **Deemston** is greater than the corresponding rate for the **US; PA; & Washington Co** by:

All Age Male Cancer in Deemston	> US	> PA	> Wash
Stomach	512%	426%	379%
Laryngeal	420%	339%	267%
Thyroid	397%	252%	209%
Kidney and renal	335%	285%	249%
Hodgkin's lymphoma	263%	204%	169%
Oral and pharyngeal	198%	179%	119%
Brain and nervous	182%	145%	136%
Esophageal	162%	105%	74%
Liver and bile	162%	136%	138%
Lung and bronchial	158%	113%	75%
Colon and rectal	152%	110%	72%
Non-Hodgkin's lymphoma	139%	100%	85%
Testicular	105%	85%	44%
Urinary and bladder	92%	42%	19%
Prostate	69%	49%	50%
Melanoma (skin)	65%	55%	84%
Leukemia	24%	8%	-2%

CANCER IN DEEMSTON BOROUGH

PEDIATRIC CANCER

During **2002-2021 (20 years)**, the average annual crude cancer incidence rate among **children (0-19 yrs) and youth (0-29 yrs)** in **Deemston** is greater than the corresponding rate for the **US; PA; & Washington Co** by:

Pediatric Cancer in Deemston 0-19 years of age	> US	> PA	> Wash
Kidney and renal	4190%	4190%	4145%

YOUTH CANCER

Youth Cancer in Deemston 0-29 years of age	> US	> PA	> Wash
Kidney and renal	1896%	1896%	1806%
Breast	1418%	1346%	1532%
Hodgkin's lymphoma	1289%	1041%	853%
Melanoma (skin)	740%	626%	445%
Thyroid	384%	247%	263%

ADULT CANCER

During **2002-2021 (20 years)**, the average annual crude cancer incidence rate among **all adults aged 20+ years** in **Deemston** is greater than the corresponding rate for the **US; PA; & Washington County** by:

Adult Cancer in Deemston 20+ years of age	> US	> PA	> Wash
Hodgkin's lymphoma	290%	229%	184%
Laryngeal	257%	201%	154%
Oral and pharyngeal	225%	203%	139%
Leukemia	198%	185%	138%
Ovarian	168%	130%	107%
Uterine	138%	72%	63%
Melanoma (skin)	127%	119%	161%
Liver and bile	114%	104%	94%
Colon and rectal	113%	78%	52%
Lung and bronchial	112%	79%	51%

◆ Deemston borough is in a region of long-standing hydraulic fracking within the expanding Marcellus shale fracking environmental justice region in Pennsylvania.

ADULT CANCER

During **2002-2021 (20 years)**, the average annual crude cancer incidence rate among **all adults aged 20+ years** in **Deemston** is greater than the corresponding rate for the **US; PA; & Washington County** by:

Adult Cancer in Deemston 20+ years of age	> US	> PA	> Wash
Kidney and renal	109%	91%	68%
Testicular	90%	76%	41%
Non-Hodgkin's lymphoma	80%	54%	39%
Esophageal	76%	40%	24%
Breast	72%	55%	46%
Brain and nervous	51%	36%	25%
Prostate	49%	40%	36%
Urinary and bladder	44%	9%	-7%
Stomach	29%	16%	4%
Cervical	11%	13%	4%

2010 Deemston Borough Total Population Age Distribution

PCIST's TIPS to Help Protect Our Families

1. RUN AIR PURIFIERS IN OUR HOMES. These machines [remove toxic particles](#) so that we don't inhale them into our lungs. This helps to prevent both cancer and asthma. The best ones have an [activated carbon filter](#) that also removes VOCs (volatile organic compounds). An air purifier handles a set amount of space, so we may need more than one (or to move the one we have when we go to bed). Found on Amazon and Walmart, Lowes, and Home Depot.

DID YOU KNOW? We can inexpensively build our own air purifier with a box fan and furnace filters. Google "How to make a Corsi-Rosenthal box" for directions. Try to use MERV activated carbon filters, which are available on Amazon and at Lowes and Home Depot.

2. REPLACE YOUR GAS STOVE WITH AN ELECTRIC ONE. Natural gas and propane stoves release invisible, odorless and toxic gases (including radon, benzene, nitrogen dioxide and methane) into our homes. These gases affect air quality throughout our homes, including in the bedrooms, and are known to cause asthma and cancer. It is much safer to cook with an electric stove.

3. USE A WATER FILTER, ESPECIALLY IN THE KITCHEN. These filters [remove harmful particles and toxic chemicals from our drinking and cooking water](#). Some come as a pitcher that we fill with water from the tap, while others attach directly to the faucet. The [best filters also remove PFAS/PFOS – forever chemicals](#) – that are known to be in Delaware County's water supply. Found on Amazon and in a wide range of department and home supply stores.

4. AVOID ADDITIONAL FACTORS that put addictive toxins in our bodies and increase cancer risk, such as [smoking](#); breathing [second-hand smoke](#); and [drinking alcohol](#). Some [infections also contribute to causing cancer](#) such as [HPV](#) (cervical cancer), [EBV](#) (Hodgkin's lymphoma), [Hepatitis B and C](#) (liver cancer), [H. pylori](#) (stomach cancer), and [HIV](#) (many cancers). If you were exposed or have symptoms, ask a doctor for [testing and proper treatment](#). All girls and women can also [get vaccinated against HPV](#) between the ages of 9 and 45.

5. FIND AND JOIN ENVIRONMENTAL JUSTICE GROUPS IN YOUR COMMUNITY TO LEARN HOW TO FIGHT BACK against the polluters that are killing us with asthma and cancer, among other diseases. Take a few minutes to [call local political leaders](#) and tell them that we [need clean air and clean water](#). Use your voice to speak up – together we are very strong and loud!

See links on www.pcist.net for suggested environmental health organizations that you can join [to get connected and learn more](#).
